Vol. 14; No. 40

Irma, Alberta, Friday, August 15th, 1930

\$2.00 per year in advance; 5c per copy.

CUTTING HAS STARTED AT IRMA

Binders have started in all parts of Irma district and by the first of next week nearly all the farmers will be busy harvesting the best crop they have had for years. With the exception of a few locations where the spring winds damaged the crops in spots, the crop is very uniform and filling well.

IRMA FAIR DRAWS GOOD EXHIBITS

Wednesday turned out warm and clear and the Irma Agriculture Society could not of wished for a better day for their annual fair. While the activity of money in the district might kept many from attending, still those who turned out were well pleased with the display in all sections. Some excellent exhibits were displayed especially in the vegetable and grain classes. The sports took up a lot of the attention in the afternoon. The Irma team came out second, best in both football and baseball. Next week we will endeavour to give a fuller report.

Wedding Bells

MILES — ENGER.
On Saturday last, the United Church Manse was the scene of a quiet but pretty wedding when Miss Alma G. Miles, the daughter of Mr. and Mrs. S. C. Miles, was united in marriage to Mr. O. Enger son of Mr. and Mrs. O. Enger. Both young couple are well known in this community and are popular among a wide circle of friends. A few relatives and friends gathered to witness the ceremony including Miss C. Sellers and Mr. and Mrs. G. J. Armstrong of Fabyan. The happy couple left for the West for a few days after the ceremony. Upon their return, they will live on their farm east of town. We wish them much happiness and prosperity in their union.

DAVIES — BULLOCK

A quiet but very pretty wedding took place in Calgary Saturday, at the home of Mr. and Mrs. W. H. Hepburn, 324 Superior avenue, when Mrs. Hepburn's niece, Hazel May, second daughter of Mr. and Mrs. F. J. Bullock, of Ponoka, was united in marriage to George Lewis Davies, son of Mrs. Arthur Davies of Edmonton. Rev. R. Brown officiated.

The bride, who was unattended, was given in marriage by her father and looked very beautiful in a dress of orchid chiffon, with hat and satin slippers to match. She carried a large bridal bouquet of opelia roses and lilies of the valley. Miss Beatrice Taylor played the wedding march, and while the register was being signed, sang "At Dawning."

After the ceremony Mr. and Mrs. Davies and their immediate relatives proceeded to the Tea Kettle Inn, where a dainty wedding luncheon was served. They will spend their honeymoon at Banff and Lake Louise, after which they will take up residence in Edmonton.

Edmonton Bulletin
Miss Bullock was formerly employed at the Irma branch of the Bank of Montreal, while George Davies was teacher in the Irma school.

WILD HORSE STAMPEDE

Something never before so realistically depicted upon the screen is the stampede of 5,000 wild horses, shown in "North Of 49", the sound screen attraction at the Wainwright Theatre, August 21-22-23. This is because it happens to be the real thing and was not made by special arrangement for the movie makers.

The stampede occurred during the taking of the picture at the annual round-up of the wild horses by the Canadian Government in Western Alberta, and the camera men of the British Canadian Pictures, Ltd., managed to get it filmed without being trampled upon, although two of them had very narrow escapes as the film shows.

Neal Hart and Barbara Kent, the featured players, as a matter of fact had to ride for their lives to escape the sudden rush of the affrighted herd.

BEE-KEEPERS FIELD DAY

Arrangements have been completed for holding another field day for beekeepers, at Irma, Wednesday afternoon, August 20th, at one of the apiaries of H. W. Love, quarter mile west of Irma. Mr. Hillier, Provincial Apiarist, and others will be on hand to demonstrate handling bees and answer questions of interest to beekeepers. A similar field day was held last spring when some fifty enthusiastic farmers met and discussed bees. Since then the bees have been busy working on the flowers and a wonderful crop of honey has been secured. Everybody is invited to attend this meeting, and an interesting time is assured. In case the bees should suspect that you are looking for some of their stores it will be advisable to bring a veil. Last spring veils were not necessary but at this time of the year the bees are not always in as good humor.

DUCK SHOOTING SEASON OPENS SEPTEMBER FIRST

Duck shooting season will open on September 1st and close on December 14th. This applies to the territory north of the Clearwater and Athabasca rivers; south of these rivers the season opens on September 15th. The daily bag limit for ducks is 30 in one day, and not more than 200 of all kinds in one season. Hunters are allowed 15 geese, coots 25, and Wilson's snipe to the amount of 25 per season.

There is a closed season throughout the year on wood ducks, widgeons, canvasbacks, willets, and many species of shore birds, also a long list of non-game birds, a list of which may be had by consulting the migratory birds convention act.

The use of automatic, swivel, or machine guns, or any gun larger than number ten gauge is prohibited, and the use of any aeroplane, power boat, sail boat or night light, and shooting from any horse-drawn or motor vehicle is forbidden.

SWEET CLOVER FOR FEEDER STEERS

In an experiment at the Dominion Experimental Station, Scott, Sask., where several roughages were being tested for feeder steers, sweet clover hay was found to meet with the same indifference at first as it does as a pasture crop. However after a few days the steers consumed quite readily their allowance of ten pounds per head per day. All lots had free access to straw.

The first test of 144 days, made during the winter of 1927-28 showed an extra gain of 102 pounds and an extra net return of \$2.67 per head where sweet clover was used. The second test of 107 days, conducted during the winter of 1928-29 showed sweet clover to give only 51 pounds increased gain per head and a loss of \$1.92 per head as compared with the check lot which received no other roughage than oat straw. In both cases the sweet clover hay was charged at \$10.00 per ton which would be a desirable market in a season when hay was plentiful and difficult to sell.

The average for the two tests shows that after realizing a price of \$10.00 per ton for the sweet clover as marketed through the steers, an additional average gain of 77 pounds and an extra net return of 38 cents per head was shown.

The policy at this Station is to make at least three tests before drawing definite conclusions but the deduction to date would indicate that sweet clover hay for which there was not a ready market, might be profitably disposed of by feeding it to steers. On the other hand, it would not seem advisable to buy sweet clover hay for steers receiving a full grain ration unless the price of such hay was low. — E. Van Nise, Dominion Experimental Station, Scott, Sask.

Chicago, Aug. 11.—Assertions from one of the leading unofficial crop experts in the country that the corn crop as a whole is in a deplorable condition and that the yield will be smaller than is generally expected, gave the corn market a decided boost today toward the last.

CROP PROSPECTS ARE EXCELLENT

As harvest approaches the condition of the crops throughout the Province is better than was anticipated earlier in the season, with the exception of the south-eastern part of the Province and central eastern areas crops are good. In the eastern area where conditions were unfavorable throughout the early part of the growing period late rains have caused excellent growth of oats and barley, and if the frost free period is prolonged, there will be fair yields of wheat.

The hot dry weather of the past fortnight has caused too rapid ripening of crops in the south-eastern part of the Province, where moisture was not plentiful. In the central and northern areas where heavy rains fell during July and where crops were maturing slowly, these high temperatures have caused more rapid ripening without serious injury to quality.

Wheat cutting has commenced in the south and will be general next week. Throughout the central and northern parts cutting will be general in from ten to fourteen days.

Frost has been reported from one point in the Peace River district, but damage seems to have been very slight. Hail damage has occurred at several points throughout the Province.

Conditions with regard to pasture, hay and feed are fairly satisfactory. In the alfalfa growing areas, the second growth of alfalfa is fairly heavy and of excellent quality. The Sugar Beet crop is better than the average.

Bennett Picks New Cabinet

Ottawa, Aug. 7.—The Mackenzie King administration passed into history this afternoon, and a new regime under the Hon. R. B. Bennett was ushered into office. All the ancient ceremonies and observances which surround the changing of the King's advisers were meticulously performed those attending visits to Government House by the retiring prime minister, a call by him upon Mr. Bennett and then a formal declaration until Mr. Bennett himself had sworn into his office. The following is the list of the new cabinet in order of precedence:

- Hon. R. B. Bennett, Prime Minister, President of the Privy Council, Secretary of State for External Affairs and Minister of Finance.
- Sir George H. Preley, K.C., M.P. Minister without portfolio.
- Hon. E. N. Rhodes, Minister of Fisheries.
- Senator Gideon Robertson, Minister of Labor.
- Hon. Hugh Guthrie, Minister of Justice and Attorney General.
- Hon. H. H. Stevens, Minister of Trade and Commerce.
- Hon. R. J. Manion, Minister of Railways and Canals.
- Hon. E. B. Ryckman, Minister of National Revenue.
- Hon. J. A. MacDonald, Minister without portfolio.
- Hon. Arthur Sauve, Postmaster General.
- Hon. Col. Murray MacLaren, Minister of Pensions and National Health.
- Hon. H. A. Stewart, Minister of Public Works.
- Hon. C. H. Cahan, Secretary of State.
- Hon. D. M. Sutherland, Minister of National Defence.
- Hon. Alfred Durnan, Minister of Marine.
- Hon. Thomas G. Murphy, Minister of Interior, and Superintendent General of Indian Affairs.
- Hon. Maurice Dupre, Solicitor General.
- Hon. W. A. Gordon, Minister of Immigration and Colonization and Minister of Mines.
- Hon. Robert Weir, Minister of Agriculture.

PICNIC AT PENDLETON'S LAKE, AUGUST 20th, 1930
The Ladies Aid of Trefaldighed Congregation will hold a Picnic and Sale Wednesday August the 20th at Pendleton's Lake. A welcome to all.

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH.
The services next Sunday will be at Strawberry Plains, Roseberry and town. The sermon topic will be—"The Universality of the Church."

ST THERESA CATHOLIC CHURCH IRMA, ALBERTA
Service on the first Sunday of each month at 11 a.m.

WOMENS AUXILIARY MEETING

The next Womens Auxiliary meeting will be held on Tuesday August 26th at the home of Mrs. George Higginson at 2:30 p.m. Mrs. Batchelor and Miss Bacon serving lunch. Everybody Welcome.

My Trip to the Yellowstone National Park

The Yellowstone National Park is the best known of the Parks of the United States due largely to its remarkable geysers. Its geyser area is the largest in the world; the variety of action and the power of eruption of its geysers are not equalled anywhere. Situated mainly in Wyoming, it is within easy motoring distance of the more populated portions of the western provinces.

The central portion is a broad plateau between 7,000 and 8,500 feet above sea level and surrounding it are mountain ranges with peaks and ridges from 2,000 to 4,000 feet higher. It is beautifully wooded on the larger part of its area. The entire region is volcanic as is evidenced by the black glass of the Obsidian Cliff, the brilliantly colored lava walls of the Yellowstone Canyon, as well as the Mammoth Hot Springs and the Geyser Basins with their paint pots, hot water pools and erupting fountains of hot water and steam.

"Old Faithful" is an outstanding geyser. He has established a wonderful reputation for punctuality. He erupts on an average every 63 minutes, often ejecting a column of intensely hot water and steam to a height of 200 feet, at times he looks like an enormous ostrich plume standing on end. Illuminated by search-lights at night, he shows himself in all his magnificence and is a never-forgotten vision of beauty.

What an ideal place it was for us to spend our holidays! Our description above does not do justice to the scenic wonders, but add to all this free lectures, guide trips, nature hikes, caravan tours, the fossil forest, the waterfalls, the wild life and the museums and one can readily recognize the endless amusement and education that such a place affords.

Our children found the bears a thrilling experience; not that we were molested, but that we saw so many. A bear lecture is given every evening at "Old Faithful" Bear feeding grounds. A ranger on horse-back talks about bears for an hour while black bears feed at the "Lunch Counter," when the two year old grizzlies come the blacks retired, finally comes the proud monarch, a huge grizzly of 900 pounds and all the rest retire leaving him to eat in peace and dignity.

The roads are good throughout and impose no heavy strain on cars; the camps are very convenient and clean and found the trip inexpensive and we thoroughly enjoyed ourselves.

J. R. Geehan and family.

When in Banff, stop at the Homestead Hotel and meet your Alberta friends. Ask to see the last edition of the Irma Times and get the latest news from home.

NOTICE
By Order of the Municipal District of Battle River No. 423.
No gravel is allowed to be taken out of Gravel Pit No. 1 on the Road allowance between Section 23 and 24-45-9 with. Anybody found guilty in contrary to this will be prosecuted, by this Council.

DRAW TICKETS.

Mr. P. J. Hardy and Mr. A. Knudsen, have been drawn as the lucky persons for a free show, during the days of August 21-22-23.

Admission: Adults 45c
Show followed by a Dance

WEEKLY REVIEW PROV. MARKETS

BEEF—Good cattle have found a fairly active demand at Edmonton this week, but the medium and in-between kinds are draggy. Prices held about steady. Choice heavy steers made from \$5.75-\$6.00; choice light \$6.25; good \$5.50-\$5.75; medium \$5.25 and common \$4.75-\$5.00. Choice heifers from \$5.75-\$6.00 good kinds \$5.25-\$5.50.

FEEDERS, STOCKERS—Offerings in this market are finding a moderately active demand at steady prices. Feeder steers \$4.85; stock steers \$3.50-\$3.75; stock heifers \$3.50-\$4.50 and stock cows \$3.50-\$4.50.

HOGS—Edmonton reports bacon advanced 10c this week, making them \$11.35; select \$11.85 and butchers at \$10.85, fed and watered.

SHEEP—Edmonton reports yearlings bringing \$4.00; ewes \$2.50-\$3.50 and lambs from \$6.00-\$8.00.

GRAIN—Democratized grain prices of last week end recovered rapidly during the present week under reports of wilting corn crops in the Western United States, and also damage to the crops in Saskatchewan and Manitoba. Alberta's crop, having had more rain recently, is standing the heat better. One grain estimate has reduced the western yield to around 300,000,000 bushels, but this seems too much of a cut.

CREAM—Receipts at creameries holding up well, but slight decrease in evidence; better pasturage may keep decline from being very marked for a time. Centralizers and country factories both quoting on basis of 25¢ per 27c for special grade.

POULTRY—Receipts are light and crates about equally divided between fowl and springs. Demand fair and most of the killers going into distribution without delay. Best heavy fowl from 10c down; broilers that weigh over 2 lbs., 12¢-13¢.

EGGS—Trade steady and prices unchanged on a spread of 22¢-24c on extras and 20¢-22c on first grade; 16c on seconds, and cracks 13c.

HAY—Dealers are reporting offers of new crop coming more freely and already several cars of timothy have been handled. Prices easing off a cutting and baling gets ahead, and upland on truck at country points generally around \$12; timothy at \$18, but may weaken as shipments increase.

HIDES—Market still in a demoralized state so far as country hides are concerned, and even at present buying prices dealers do not care to handle them as they see no improvement owing to large stocks of leather in the hands of tanners, and low priced packer hides supplying any raw requirements that may be needed.

WOOL—Shipments moving freely from all parts of Canada and Alberta clip well distributed. Dealers on small lots quoting 7¢-8c city deliveries.

Mistakes

Glancing through a magazine recently the writer's attention was attracted by an article bearing the same title as appears at the heading of this column, "Mistakes." It was a short article, but two paragraphs in it stood out as important and worth-while, worth passing on for the consideration of those who read this column from week to week.

After rectifying mistakes made by "Great Men of Business," and the different ways in which they react to them, the article in question offered comment.

"Looking back over history, it would seem that mistakes, of themselves, are comparatively unimportant. All men make them. The important thing is how a man acts afterwards."

There is sound philosophy in that observation. It is deserving of more than passing attention.

All people make mistakes. Not one of us is infallible. The real test is: Do we profit by them? Do we use them as stepping stones to real achievements, to the winning of success? Or are we embittered by them, discouraged; inclined to give up and let go?

When a business man makes a mistake, jeopardizes, even loses, the savings and accumulations of a life time, and then begins to think of throwing up the sponge, contemplates suicide, or some other rash act, it is a confession that he was not really a big man after all; that he is lacking in stamina, will-power and true courage.

Experience is a hard taskmaster, a bitter teacher, but—it is a teacher, and a good one at that, because it is through experience that we do learn.

All men make mistakes, big men as well as little men. Nor is it individuals alone who make them. Governments make them, communities make them, nations make them. They must pay for their mistakes, but they can also profit from them.

One of the mistakes of this present age is to confuse bigness with greatness, to confuse quantity with quality. Next year the census of Canada will be taken, and already communities are anxiously awaiting the figures to ascertain to how large an extent they have grown in population, each town and city hoping they have outstripped their rivals. But how many have been giving serious consideration during the past ten years to the quality, rather than the quantity of their citizenship? The United States census has just been completed, and we find some of their larger cities, while boasting of their growth in size, seriously regretting that they were not smaller by some thousands of criminals and others of an undesirable class. In their ambition to become big and bigger they have made the mistake of ignoring the quality of their citizenship, and neglected those social provisions which would make their communities big in the trust, highest sense.

It is not the manufacturer who, through mass production, is turning out an enormous volume of products who is the truly successful man and a benefit to his country, the really successful man is he who is producing quality products. Nor is it the farmer who is operating several sections of land in a more or less indifferent way who, in the long run, will prove successful; it is the farmer who is farming intelligently, striving to raise the best quality of grain, the best grade of stock, poultry and dairy products, with trees and flower and vegetable gardens, who is establishing a real home, making a lasting contribution to his country, and a success in his life work.

But to return to our theme, "Mistakes." All men make them. Do not be discouraged by yours. Remember, the important thing is how a man acts afterwards.

This is a comforting thought. You can retrieve your mistakes. If you had always been right during the past five or ten years you might be much better off financially today than you are. But you have those experiences to guide you now, and you can profit from them if you will.

But, and here let us quote the second outstanding paragraph in the magazine article to which reference has been made, it reads:

"Don't make the most serious mistake of all, that is to think about your mistakes."

Forget them, except to profit by them. Don't brood over them; don't let them discourage or embitter you; don't weaken; don't regard them as irretrievable disasters. Be up and doing; forget them; use them to rise to greater heights and a larger success.

Would Deport Communists

U.S. Congress Is Urged To Take Necessary Steps

Representative Hamilton Fish, Jr., in a radio address from New York, urged that congress take appropriate steps to deport all alien agitators and Communists affiliated with the Third International.

"We have tolerated them and their criminal activities too long," he said. "Let them go forth, or be deported back to their native land."

Congressman Fish, who is chairman of the special committee investigating Communist propaganda in the United States, asserted that what the Communist leaders do in Russia is solely the business of the Russian welfare.

"What the emissaries of the Soviets do in the United States of America, however, is our business," he added.

Book Agent—Sir, this encyclopedia will tell you anything you want to know.

Citizen—Is that so? You turn to the page where it tells you killed Cock Robin and read it off to me.

An Old Remedy

that never loses favor. Minard's Liniment has been in use for fifty years. A sure test of quality.

W. N. W. 1850

Time Element In Cancer

Different Periods Of Life Have Bearing On The Trouble

A curious time element in cancer is described by Sir George Lenthall Cheate, British cancer authority. He is chief surgeon of King's College Hospital, in London, England, and is attending the British Medical Association meeting in Winnipeg.

"There is one time when previously harmless stages of growth are likely to become cancer rather suddenly. This is in the same relative period of life for both men and animals."

"It suggests," Sir George said, "that either some fresh, as yet unknown factor or agent may enter the body just at the critical time and cause cancer, or that the different parts of the whole cycle for a continuous process, and one part passes naturally from one stage to the final catastrophe of cancer."

"The first stage is most prevalent from the late twenties to the thirties, the second stage takes form in the late thirties and early forties. The change into cancer occurs in the late forties and early fifties of life."

Guard Baby's Health in the Summer

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentery, come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of such aid to mothers during hot weather as Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Repair Brock's Monument

New Arm and Hand Piece Placed In Position

Brock's monument is again entire, and the great arm and hand point out over the lake toward the northern shore. Recently Hon. George S. Henry, Minister of Highways and government members of the Niagara Park Commission, made an inspection of the finished job, and the scaffolding was removed.

Carved out of a single stone weighing three tons, the massive arm and hand piece was placed in position. The old arm was taken to Hamilton and wired together to serve as a model for the new one. The old arm was broken in a storm two years ago.

It Will Prevent Ulcerated Throat. At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

Large Organ In Paris

Having 4,800 pipes, one of France's largest pipe organs was recently dedicated in the huge Salle Pleyel, a concert hall in Paris. The instrument has 71 stops. Its concealed machinery is controlled by 750 wires contained in one cable connecting the organ with a chamber under the stage.

Have Minard's Liniment on your shelf.

Put To Strange Use

"It's a funny use to make of it," commented Dr. C. H. Best, co-discoverer of insulin with Dr. F. G. Banting, on the report that the London Society for the Study of Insanity is using insulin for the treatment of delirium tremens. Dr. Best explained that an overdose of insulin is equivalent to an overdose of alcohol.

SALADS

Operated Under Difficulties

Doctor Performs Serious Operation On Board Ship With Cruise

An intricate and delicate operation, a pair of pliers borrowed from the carpenter, a bottle of Holland gin and a needle and linen thread, saved the life of a seaman stricken with appendicitis, and as a result Dr. David R. Robbins, Los Angeles surgeon, recently was presented with a huge silver loving cup by the Planet Steamship Company.

A little more than a year ago Dr. Robbins and his wife left Los Angeles on the steamship "Noorderdyk" for Germany, where the doctor was going to study for a year. He left all his surgical instruments at home, intending to buy new ones in Germany.

Three days out of Panama, the "Noorderdyk" received an S.O.S. from the steamship "Corvus" saying that Henry Lohse, 21-year-old sailor, was stricken with appendicitis. The "Noorderdyk" steamed to the "Corvus" and when they met, Lohse was transferred to the "Noorderdyk." Dr. Robbins was asked to save the man's life.

Dr. Robbins borrowed a carving knife from the cook, made the incision and with the pliers removed the appendix. He then sewed up the incision with a needle and thread borrowed from his wife and disinfected the wound with Holland gin. A piece of rubber tubing from a shower bath was used for drainage. As a result of the operation, Lohse is hale and hearty, thanks the main brace and lustily sings, "Blow the Man Down."

Because he used such strange instruments, Dr. Robbins refused to accept any pay for the operation, stating that the operation under such strange conditions might not prove successful.

However, the steamship company did not forget Dr. Robbins' deed on the high seas, and when he returned to Los Angeles from his year of study in Germany he was presented with the silver loving cup.

Start Long Trail Ride

Party Of Britishers Undertake Long Journey Through Rocky

Starting on a trail ride that has never before been attempted, Sir Reginald Blaker, Bart., of London, England; S. C. T. Littlewood, of Surrey, England, and J. Wilson Perry, of Salep, England, left the Rault Springs Hotel recently for a trans-Canada ride to Fort Hope, B.C., with the possibility of continuing from that place to Vancouver by the same mode of travel.

The route they are following takes them past Spray Lakes, by the Snake River to Palliser Pass, then down Palliser River to the Kootenay. This section of the ride is the route discovered by Capt. Palliser, in 1858. They will cross the Kootenay, then Tiger Pass to the Columbia River. After crossing the Columbia at Wilmer, they will follow Toby Creek to Toby Pass, then crossing the Selkirk system and will descend the Duncan River. From Nakusp to Edgewater they will travel by boat, then cross the Fire Valley Pass to reach the Okanagan, Princeton and Port Hope.

Some sections of the trails they will travel have not been packed over for twenty years, so some trouble may be experienced in getting through. The whole party consists of the three principals mentioned, Sir Reginald's chauffeur, a guide and two men. Eleven pack horses constitute the train.

Persian Balm—Invaluable to the whole family.

To the mother, a flawless aid to loveliness. To the child a soothing, healing balm. And to the father, a splendid hair fixative and cooling shaving lotion. Persian Balm tones and refreshes the skin. Makes hands delightfully soft and white. Indispensable to dainty women. A little gentle rubbing and it is absorbed by the tissue, making the skin truly rose-leaf in texture.

Saskatoon's Growth

Approximately 10,000 names will be added to the voters' list in Saskatoon riding, figures compiled by enumerators reveal. The total will likely be in the neighborhood of 29,000. The urban polls are expected to mount from 13,335 in 1926, to about 22,000 this year, indicating the substantial growth in Saskatoon's population.

Saskatchewan Wheat Pool

According to the latest report the Saskatchewan Wheat Pool has a membership of \$2,290 farmers. During the year ended May 31st, the provincial organization handled through its own elevators 87.2 per cent. of all pool grain—this being said to be the high water mark of co-operative grain handling.

Interest in mail and travel aviation in Argentina is growing rapidly.

Minard's Liniment removes Warts, relieves Bunions.

Don't Let Constipation Lead You Into Serious Illness

Serious rectal troubles, piles, paralysis, hemorrhoids, are frequently the result of using cheap cathartics.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO in a glass of water every morning, tones up and sweetens the entire system.

ENO'S "FRUIT SALT"

Importance Of Rubber Industry

Canadian Rubber Products Exported To Many Countries

Now-a-days the world moves on rubber, and this does not apply to automobiles alone. According to a recent return of the Canadian Government the people of Nigeria, in June, bought 500 pairs of shoes with rubber soles from Canada. Barbados took 3,020 pairs and Trinidad 6,553 pairs.

Although Canada is not a producer of raw rubber, the rubber industry is of much importance and rubber products are exported to many countries of the world. In June the export of Canadian automobile tires exceeded \$1,000,000. The largest buyers were New Zealand, British South Africa, Belgium, Argentina and Brazil.

Douglas' Egyptian Liniment is remarkable in its quick, effective action. Relieves instantly burns, sprains, toothache and neuralgia. Invaluable for sore throat, croup and quinsy.

Poultry Losses

Twenty-Six Million Dollars Lost Annually Through Disease

Twenty-six million dollars is the price paid by farmers and poultry raisers for loss through diseases in poultry flocks annually according to recent estimates. Most of this loss is caused by the internal parasite and according to F. C. Elford, Dominion Poultry Husbandman, much of it is preventable. A good deal of it, he points out, can be eliminated by keeping young chicks away from adult birds and on absolutely clean soil.

Big Cut In Naval Costs

RL Hon. A. V. Alexander, First Lord of the Admiralty, announced in the House of Commons that the Labor Government reduced the cost of the British naval building programme for 1928-29 by an estimated £12,000,000. Mr. Alexander made the announcement in reply to a question about how much naval costs had been reduced since the present government took office.

Statutes To Women
There are statutes to twelve women in London, England; of these, six are queens, the other half-dozen being Mrs. Siddons, the actress, Florence Nightingale, Grace Darling, Nurse Cavell, Margaret MacDonald, the Prime Minister's wife, and Mrs. Pankhurst.

Reduced By Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should be by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

A species of acacia which occurs in the Sudan, has extremely hollow shoot-sheaths, which produce sounds like sweet-toned flutes.

If a woman isn't married she wants to be, and if she is, the chances are she doesn't want to be.

Western Homesteads Can Be Beautified by Planting Flowering Shrubs About House and Yard

Far too many homesteads lack the finished effect that may be obtained by planting a few flowering shrubs about the house and yard. Without shrubs there is nothing to fill the angles formed by paths or fences, or to screen unsightly objects; nothing to soften the abrupt angles formed by the corners of the building or where the foundation meets the ground; nothing to take away the bare appearance of the home and to give it an air of permanency and coziness.

The majority of people appreciate the beauty of shrubbery, and realize how much improvement can be brought about by its use, but for various reasons many fail to do any planting. The chief reasons for this neglect are probably the cost of planting material and a lack of knowledge as to what to plant. If all the planting material is bought at one time, the cost is in many cases prohibitive, and, if the work is to be done well, the labor involved will be considerable. For this reason it is never wise to attempt to do a great deal in any one year. A little planting done each year and done well will bring surprising results in a short time. The cost of some beautiful flowering shrubs is small; and everyone can afford to buy at least one or two each year. From now on be propagated easily by the amateur and therefore have to be purchased from a nurseryman. Others are very easily propagated, and, when one specimen has been bought, it may easily be increased to supply all of that species that will be required.

Many rules for the arrangement of planting material have been given by experts from time to time. These frequently involve a large outlay and considerable study, but, while they may lead to wonderful results, they also have the effect of discouraging those who are able to do only a small amount of planting. This should not deter anyone from making a start. The greatest amount of pleasure will be found in arranging the shrubs to suit one's individual taste. If, after a time one sees where an improvement could be made, the shrubs may easily be transplanted and rearranged.

There are a few simple rules which may help one to avoid common mistakes. Do not plant the shrubs too close to the foundation of the house, but picture them as they may be ten or twelve years after planting, and allow them plenty of room to grow up a symmetrical shape. If the earth is poor and consists chiefly of sub-soil thrown out from the cellar, dig a hole about three feet in diameter and about twenty inches deep, fill it with good earth from the garden or yard, work in some well-rotted manure as the clay is filled in, and pack the clay firmly while filling. Then plant the shrub in the centre being careful not to have manure coming in direct contact with the roots. Cultivate the surface occasionally for at least for the first two or three years, or till the shrub is firmly established and has made considerable growth. When planting shrubs in a shady position, be careful to choose species that do well in the shade. Whenever possible visit the nearest Experimental Station during the growing season. This will assist in making a choice of varieties. Send for the nurserymen's catalogues and study them. They contain many valuable suggestions.

Sheriff Is Appointed
Louis J. Howe is the new sheriff of Manitoba's eastern judicial district. Former deputy secretary for the province, his appointment to succeed the late Col. Rupert Inkster was announced recently.

Scientists have now produced an artificial silk from water and carbon dioxide gas.

"I hate going home; my wife never does anything in the house."
"I mustn't grumble, I've a fine wife. She makes my bed, cleans my boots—and even turns out my pockets."—Moustique, Charleroi.

Canadian Sugar Industry

Wages Paid By Eight Sugar Refineries Total \$2,748,396

The total amount of wages paid by the eight sugar refineries of Canada last year was \$2,748,396, a slight increase over 1928, according to a return issued by the Dominion Bureau of Statistics. Capital invested amounted to \$43,534,113, a decrease from \$48,625,818 in 1928. The Canadian refineries employ 2,325 persons, of whom 2,018 draw wages and 307 are salaried.

The value of the products amounted in 1929 to \$47,151,960, which was a decrease from \$52,035,155 in 1928. (In 1925 the gross value of the sugar products of the eight refineries was \$68,446,879.)

Last year 32,556 acres were grown to sugar beets, with a yield of 7,233 tons per acre and a total yield of 235,465 tons. The average price per ton was \$2.854, giving the total value of \$2,080,996.

Food Preservative

Scientists Isolate Natural Agent In Milk Which Prevents Growth Of Micro-Organisms

A successful, non-poisonous food preservative may be obtained from cow's milk as a result of recent investigations reported by Drs. F. S. Jones and H. S. Simms of the Rockefeller Institute for Medical Research. These scientists were able to isolate the natural agent in milk which prevents the growth of micro-organisms. It is found in the whey after the routine separation of the butter-fat and casein. It can be obtained in pure form in a powder which keeps for several months. One grain of the powder added to a gallon of the ordinary medium on which germs grow will prevent their growth, it is reported.

(By Annette Worthington).

2547

A red and white dotted dimity that will instantly win approval with the dainty Miss of 8, 10, 12 and 14 years. It's sleeveless! So comfortably cool and smart. The crisp white organdy capelet collar falls so prettily over the arms giving the impression of cape sleeves. The circular skirt with shaped hip yoke, contributes smart sophistication. Style No. 2547 makes up attractively in peach-pink shantung. Nile green linen, yellow and white pique with white pique collar and printed tub silk in dusty-pink tones are fashionable suggestions. Pattern price 25 cents. Be sure to fill in size of pattern. Address: Pattern Department.

Problems For the Farmer

Low Wheat Prices Create a Difficult Situation For the Grain Grower

With another wheat crop coming along and a large surplus still on hand from the previous crop, the situation is far from cheerful. Everybody in an agricultural country such as Canada has a stake in the state of the farming industry, yet it will be conceded that the problem rests more heavily on the shoulders of the actual producer than on anyone else. Difficulty is met in predicting the probable curve of wheat prices for the reason that a year of small yields over a large section of the world's wheat growing areas would be almost certain to lead to an advance in price that would make wheat growing look like a remunerative business to the producers who happened to have wheat for sale. At the same time there is a fairly widespread opinion that wheat prices are likely to remain at a lower level than has been the case during the last seven or eight years. This would indicate that the world is producing all the wheat that the world can afford to buy and that the surplus countries are responsible for the sharp break in prices.

Will it benefit Canadian farmers to grow less wheat under the circumstances? If the wheat acreage is reduced, what is to take its place? Is there any guarantee that the other wheat growing countries in the world will reduce their acreage? Can the hands of Western Canada be turned to some other form of farming that will be profitable? Can a change in farm methods make it possible for the Western Canadian farmer to grow wheat at a profit even when the price is low?

In the last analysis it appears to be the job of the farmer to suggest means for solving his own problem. If he is the victim of exploitation this should be made known. If his methods are wrong they should be possible for correction. We have many successful farmers in Western Canada who should be able to throw some light on the problems that confront the country's basic industry.—Regina Leader-Post.

Mining In British Columbia

Increases Quantity Production In The Aggregate Of Metals

Despite world-wide depression in the mining industry, following the drop in metal prices, mining in British Columbia during the first half of the year has shown encouraging progress, according to the semi-annual summary of the British Columbia Department of Mines.

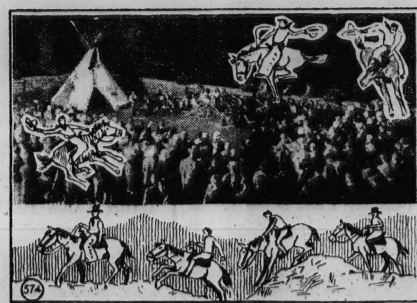

There was increased quantity production in the aggregate of mineral and metals, but owing to low metal prices, the gross value dropped from \$34,122,722 in the first half of 1929 to the estimated \$29,909,487 for the first half of 1930, a decline of more than 12 per cent. Among the unfavorable features are included the rather uncertain outlook for any material movement in silver and zinc prices for some time to come, which may cause certain hitherto productive mines in British Columbia to remain closed indefinitely. Coal production also fell away 18 per cent.

Trade With Japan

Howard Marler, son of the Canadian Minister to Japan, made a statement, while passing through Winnipeg recently, to the effect that there is a splendid opening for Canadian manufacturers in Japan. Although trade is rapidly developing, he pointed out, there is still a great need for manufacturers to appoint representatives in the Far East.

Girls are now forbidden to powder their noses in Romania. They will be a shining example to the rest of the world.

"ROUND A CANADIAN CAMP FIRE"

On the terrace of the Banff Springs Hotel, recently the above-named ballad opera was presented by the Alfred Heather Light Opera Company, now giving a two-month season of Canadian and Old English ballad opera at the hotel. Tepee, log fire, cordwood seats and even a portable organ were among the props and hundreds of guests were shown what an evening camp and sing-song are like. The Opera Company was assisted by Trail Riders of the Canadian Rockies seen clustered around the fire. The scene will live long in the memories of those who witnessed it.

Watering The Garden

Use Of Watering Can Largely Wasted Effort, Says Expert

The use of the watering can in the garden is largely a waste of effort, declares W. D. Albright, superintendent of the experimental station of the Dominion Department of Agriculture, at Beaveridge, Alberta. If the same effort is spent on keeping weeds out of the garden it will result in more soil moisture being conserved for the growing plants than it is possible to give them through the use of the watering can, he states.

It requires at least one half-inch of rainfall to moisten a dry soil deeply enough to reach many of the feeding roots on the average plant. And, even with such a rainfall, much of the moisture is lost through evaporation before the plant roots are reached. The average application from a watering can is much less in volume and under many conditions it is much more subject to rapid evaporation.

Half an inch of rainfall provides moisture equivalent to a pailful of water to every square yard of garden; 30 pailfuls to a square rod, or 2,400 pailfuls for a garden eight rods by ten rods. From this it will be readily seen that watering the garden adequately once a week becomes a man-sized job.

Weeds are the greatest menace to garden crops, particularly because of the extent to which they rob the soil of moisture needed by garden plants. If the same amount of time spent by the average gardener in the use of the watering can was expended in applying the hoe to keep weeds under control it would insure the conservation of more moisture to the growing plants than can be provided in the same length of time through the use of the watering can.

The most effective way of watering the garden is to dig a trench with a hoe near the plants or to punch holes and pour water into these. This brings the water more directly in contact with the feeding roots and prevents evaporation. Not only is the water lost when applied with the watering can but it frequently impairs the physical condition of the soil by puddling the surface.

Population Increasing

Canada's Population Estimated At 9,934,500 By Ottawa Bureau

Canada's population on June 1, has been estimated at 9,934,500 by the Dominion Bureau of Statistics. This represented an increase of 137,700 over 1929 estimate.

In a report recently issued, the bureau gave the following figures as the estimated population of each province and territory: Prince Edward Island, 85,800; Nova Scotia, 553,900; New Brunswick, 423,400; Quebec, 2,731,600; Ontario, 3,313,000; Manitoba, 671,500; Saskatchewan, 882,000; Alberta, 660,000; British Columbia, 587,000; Yukon, 3,700; and the North West Territories, 9,600.

The following figures show the growth of Canada's population during the past decade: 1921, 8,788,483; 1922, 8,909,600; 1923, 9,028,000; 1924, 9,151,000; 1925, 9,269,000; 1926, 9,390,000; 1927, 9,519,000; 1928, 9,658,000 and 1929, 9,796,800.

Bounty On Coyotes

Payment of a bounty on coyotes, for which the farmers of British Columbia, especially the sheep men, have been agitating since the bounty was abolished last year, will be resumed under a recent order-in-council. The Department of Agriculture will pay the bounty at the former rate, viz. \$7.50 for coyotes, \$15 on wolves, and \$40 on cougars. Trained hunters may also be used to kill off predatory animals when necessary.

Surplus Of Wheat Is A World Condition And Not Restricted To Canada Alone

Successful Field Day

Manitoba Wheat Pool Sponsors Gathering At Brandon Experimental Farm

About 300 people from thirty-three points adjacent were represented at the successful field day arranged by the Manitoba wheat pool and held at the Experimental Farm at Brandon. E. J. Watson, local field man for the wheat pool, had charge of the arrangements.

The horticultural work being done at the farm under the direction of J. H. Cooper, was viewed by the visitors. Guided by S. J. Sigfusson, they then inspected the cereal plots where Mr. Sigfusson drew attention to the treatment of summerfallow, comparing plowing summerfallow with the use of the cultivator only. They also visited the cereal breeding plots.

The advantage of plowing under sweet clover as a means of soil enrichment instead of plowing under grasses was evident when the party accompanied Dr. Buckley to view plots where crops were flourishing where land had been so treated. Fred Harrison explained how to select wheat for seed plots for registered seed or exhibition work. Adjournment was made to the tent where these problems were discussed further.

Mr. Mahoney, of the Wheat Pool, acted as chairman.

While the men were touring the grain plots the women were shown the results of poultry feeding tests with cod liver oil and grain mixtures. R. M. Hopper gave a demonstration of the best ways to cull poultry.

Wealth From Forests

Canada Is The Chief Source Of The World's Paper Supply

The forests of Canada continue to be the chief source of the world's paper supply. During the past month Canadian paper has been exported to 33 countries, ranging through the alphabet right from Australia to Uruguay. Without the forests and paper mills of Canada the business of supplying the world's news to the public would be seriously restricted. Canada is a beneficiary of famous for her paper as for her wheat.

Paper and wheat are more closely related than appears on the surface. Much of Canada's forested area is potentially good farming country, and as the forests are removed for the manufacture of paper and pulp goes under the plough and is devoted to agricultural production. Forests, in such cases, are a source of income to the new settler who receives cash for his pulpwood while clearing it off his land.

While Canada's principal export of paper is for printing purposes there is an interesting variety of other paper products. Wrapping paper, writing paper and wall paper are exported to many countries, and in June more than a million pounds of paper wall boards for building purposes were exported to the United Kingdom alone.

Alberta Resources

Natural Resources To Be Handed Over To Province On October First

Alberta's natural resources will be formally handed over to the province on the first day of October, it was announced by the Provincial Government. An agreement providing for the formal transfer of the resources has been reached between the provincial and Federal Governments, and has been signed in their behalf by Premier Brownlee and Hon. Charles Stewart, respectively. The effect of the agreement is merely to fix the cut-off date, having no relation to other terms of settlement.

Airplane Extension Course

New York University has announced an aeroplane extension course which will be inaugurated this fall. The project calls for the transportation by air of professors of the university at intervals to a number of towns in New York and neighboring states where instructions in aviation will be given in grade schools, high schools and others.

More Workers Employed

In a report issued recently, the Dominion Bureau of Statistics, in analyzing the employment situation in Canada, said there were 21,296 more persons earning wages in Canada on July 1 last, than on June 1. From reports sent in by 7,283 firms, it was computed that 1,043,232 workers were employed in Canada.

A man in love gives; a woman in love forgives.

Many people these days are disposed to criticize the Canadian Wheat Pool for the large quantity of wheat that will be carried over in this country into the new crop year, says the Monetary Times. Fair-minded people, however, will temper their criticisms somewhat when they become conversant with the fact that the surplus of wheat is a world condition and not restricted to Canada alone. Some weeks ago attention was directed in these columns to the fact that in the United States the situation was recognized as so important that the Department of Agriculture at Washington, got out a survey of the world situation, and suggested that a reduction of acreage by the American wheat farmer in conjunction with a study of his costs would be the desirable course. The fact that the United States Government takes such action recalls in a measure the uproar which was caused by the British policy of rubber plant restriction a year or two ago.

In the years since the war the acreage sown to wheat has shown a steady increase all over the world and with supplies increasing at a rate faster than the consumption it was inevitable that a surplus should be created. Just how this is to be absorbed in the next few years, short of a total crop failure, constitutes a problem.

The Orient is generally indicated as the most likely part of the world to increase its consumption of wheat. The rice-eating people of the East are gradually becoming wheat consumers to a greater extent. This has been due, no doubt, to a variety of reasons, one of which may doubtless be traced to the large numbers of Chinese laborers employed during the great war in France. Many who saw service in France will remember the Chinese labor battalions eating their midday meal by the roadside, boiling what looked like big dumplings of dough made from wheat flour. Moreover, as has been noted previously, export funds with school children in Japan and the Philippines have demonstrated the advantage of adding wheat to the diet.

However, in the meantime, new areas of the Canadian West have been opened up from year to year, and more land brought under the plow while South America and Australia have also tended in the same direction and supply has increased faster than demand. Whatever fault may be found with the Pool for its method of trading, they are not altogether to blame for the fact that Canada will have a large wheat surplus.

Central Heating Plan

Central Heating Plants In Winnipeg Are Being Extended

In Winnipeg "central heating" does not mean furnaces in the basement of each house—it means a large central plant from which the heat is piped to many blocks of business buildings and residences. This principle of heating is not a new thing in Winnipeg, where it was first established in 1924. The municipal steam-electric plant which was required as a stand-by for electric power was utilized to provide heat when not required for other purposes. The scheme proved a success and has since been extended. A private company is now entering the field with a \$2,000,000 steam-heating plant in another section of the city.

Manitoba Phone Surplus

Surplus of \$1,213,916 in the operation of the Manitoba Government Telephone System for the seven month period ended June 30 last, is reported. Revenue for the period totaled \$2,244,740.

The secretary of the Dixon, Illinois, club, says: "Even a tombstone has a good word for a man when he is down."

Wife: "That man always wears his medal for bravery."
Husband: "Well, what about it? I always wear my wedding ring."

HONEY DAYS
ARE HERE AGAIN

During the past week, Miss Lillias Milne, has been holding demonstrations on the use of honey, in stores in Wainwright, Irma, Hardisty and Viking. In each of the stores visited the ladies attending were most interested in the dainty cakes, candies and good things that were on display. All of these were made by using honey for sweetening and flavoring.

Following are some of the receipts used by Miss Milne and we recommend their use to any of our readers:

Preserved Cantaloupe —

Honey one pound; Cantaloupe one pound. Bring the honey to a boiling-point and drop in the prepared cantaloupe, which should be cut in thin slices.

Delicious Baked Beans with Honey—

Cook a quart of navy beans until tender, season with salt and pepper to suite your taste, then put on a heaping tablespoon of lard and four level tablespoons of honey and bake one hour.

Apple Sauce with Honey —

Sweeten apple sauce with honey instead of sugar.

Salad Dressing —

Beat together one tablespoon candied honey; two tablespoons thick sweet cream; one tablespoon vinegar; one-quarter teaspoonful mustard pepper and salt to taste — no cooking. This is excellent over salad made from chopped apples and celery.

To Prevent Grape Jelly Scurrying —

Add two tablespoonfuls extracted honey to one pound of jelly. Let it boil two minutes longer, then fill your jelly glasses.

Honey Cookies —

Blend one-half cup of honey; one tablespoon butter; one egg beaten lightly; one-half teaspoon baking powder; pinch of salt; flour to make a stiff batter. Drop in buttered tins. Bake in slow oven.

Honey Ice Cream —

One quart of fresh cream; one cup of honey. Mix well and freeze. No flavoring required.

Honey Nut Brownies —

Two eggs; one-half cup of honey; two ozs. chocolate; one-quarter butter; one-half cup of sugar; one-half cup of flour; sifted with one-quarter teaspoonful baking powder; one cup of chopped nuts.

Melt butter and chocolate together, then add honey, then flour and baking powder sifted together, then then mix. Bake 45 minutes in slow oven. Cut in strips one-half inch wide and two inches long. For immediate use it is better to use one-half sugar and one-half honey. Roll in powdered sugar.

Honey Prune Bread —

Beat two eggs lightly; add one cup of honey, three cups of sour milk, two large cups of flour; three cups of large granular flour; three tablespoons of soda; beat in flour; one teaspoon of salt. Bake in slow oven, 45 minutes or more. This will make two loaves, and keeps moist and soft a long time.

Honey Pudding —

Take a cup of toasted bread crumbs, rolled fine; one quart milk; one teaspoon soda; one cup of honey; one cup of raisins; one-half teaspoon cinnamon; one-half teaspoon nutmeg; three eggs and one teaspoon butter. Stir or boil one-half to three hours. Serve with any sauce desired.

Honey Orange & Nut Bread —

One egg yolk; one cup of milk; three cups of flour; one-half cup of chopped nuts; four teaspoons of baking powder; rind of three oranges; one cup of honey; one-quarter cup of water; salt.

Method: Cut the rind of oranges in small slices. Boil in salty water until soft, about one-half an hour, drain well and boil very slowly in one cup of honey and one-quarter cup of water until very thick. Beat egg yolks thoroughly. Add milk and flour sifted with dry ingredients. Then add while still warm. Add chopped nuts. Place in well greased loaf tin and bake slowly one hour. This should make two loaves.

Honey Whip Cream —

To each cup of whip cream allow two teaspoon of honey. Cream whipped with honey will stand up well and can be used for garnishing desserts, fruit salad, etc.

Wedding Bells

(From The Viking News)

BROWN — HODGINS

A very pretty wedding took place at the home of Mr. and Mrs. Lloyd Mackey, 15 miles east of Viking on Wednesday afternoon at 3 o'clock when Mr. Wylie P. Brown, son of Mr. and Mrs. Fred Brown was united in marriage to Miss Pearl Hodgins, youngest daughter of Mr. W. J. Hodgins of Phillips. The Rev. Mr. Taylor of Jarow officiating. The couple were attended by Mr. Hilson Hodgins, brother of the bride and Miss Hazel Brown, sister of the groom. The bride was charmingly dressed in white flat crepe with hat to match, and bridesmaid wearing a blue costume. Those who were in attendance at the wedding were Mr. and Mrs. Fred Brown and family, Mr. and Mrs. Jas. E. Currie, Mr. W. F. Hodgins and son Hilson, Mr. and Mrs. W. J. Brown, Mr. Joe Johnson. After the marriage the guests sat down to a delicious supper after which Mr. and Mrs. Brown left by car for a visit with relatives in Montana.

The young couple are well known in the community having resided here since childhood and their esteem was well shown by the number of beautiful gifts. When they return they intend making their home in Viking where Mr. Brown is an employee of Brown's Garage. Best and hearty wishes are extended to Mr. and Mrs. Brown from the Community.

The group of tennis players from Strome made such a favorable impression that an invitation was extended to them to again visit with the local club last Wednesday. The afternoon was spent in lively contests on the courts, after which all repaired to Lake Thomas to enjoy a picnic and swim. The lake, so convenient to Viking, excited the admiration and envy of the citizens of Strome who have no such lake to enjoy. A dance was arranged for the final item of entertainment and the E.K.'s Community Hall resounded to much merriment as the Viking Serenaders "strutted their stuff."

Messrs. Henry Slates, Geo. Loates and O. S. Smith, all in the sights at the Wainwright fair last week. They report that the fair was quite up to the mark, while the attendance was not as good as former years.

Miss Mae Poboda returned from a visit to Calgary this week. She was accompanied here by her sister-in-law Mrs. Emil Poboda and little son Jack.

Sid Ross left yesterday for Calgary where he is managing a Drug Store, after spending two weeks vacation with his parents and sister here.

Roy McDonald and Harry Lawes spent a few days fishing in Driel Meat Lake and report very good success.

Evan Jones has been assisting his brother Percy Jones at Irma setting up binders to take care of this year's crop.

Mrs. Barker and daughters Marjorie and Mable returned on Friday from a visit with relatives and friends in Edmonton.

Max Gray returned last Tuesday to Condon to resume his duties buying grain after a month's holidays with relatives and friends here.

Mrs. Ira Prichard is leaving on Thursday of this week for an extended visit with relatives and friends in Iowa.

Mr. and Mrs. Royce Gravert and child along with Miss Evelyn Gravert left by motor last week for Marwayne.

Misses Agnes and Ester Wicks have both resumed their duties after enjoying a two weeks vacation.

Mr. and Mrs. Geo. Taylor and family left last Tuesday noon by motor to visit with Mr. and Mrs. Christy at Condon, Alberta. Messrs. Sid Ross and Max Gray will accompany them as far as Red Deer.

Mrs. H. M. Hilliker and Mrs. M. Hyslop attended the annual conference of the Women's Institute held at Loughheed on August 7th, a report of which will appear in next week's paper.

Miss Gladys Reishus has been visiting with her brothers Arthur and Raymond Reishus at Marwayne.

J. L. Small, inspector operating at the News office, is enjoying a two weeks vacation.

Mr. and Mrs. Purvis and son Stuart are on a motor tour to points in Saskatchewan.

Mrs. and Mrs. Chiswell motored to their farm south of Alliance the first of the week.

Miss Ada Conford, of Edmonton, is spending a few days with her aunt, Mrs. E. Barker.

Mr. and Mrs. Fitzmaurice and children are enjoying a holiday at Banff and other points in Alberta.

Miss Freda Bell has returned to Edmonton where she is training as nurse in the Misericordia hospital.

John Golka and son Floyd have returned from a holiday trip to Banff where they spent two weeks.

The Wastebasket

Heard on the street: "Since I bought my car I don't have to walk to the bank to make my deposits." "Ah, you ride there." "No, I don't make any."

"When I was young, girls never thought of doing the things they do today," said a Bruce mother to her flapper daughter. "Perhaps that's why they didn't do them," the flapper replied.

A local fellow dreamed the other night that he had died and on arriving at the golden gate St. Peter asked him if he had ever petted or kissed a girl. On his replying that he had not, St. Peter said: "You should have come sooner; you've been dead a long time."

Here is an advertisement thirty years ago indicating a feature of the days of real sport: "Dye your whiskers a natural black with Buckingham's dye."

"My wife," said a minister at Ryley, "often helps me out with my sermons." "H'm," replied a member of his congregation, "my wife preaches all of the sermons in our house."

"They say marriages are made in heaven," said an old maid at church social in Wainwright. "Ah, then you will have another chance," replied one of her hearers.

"Ah, darling, I see you have prepared something with your own little hands," said a recent bridegroom on coming to dinner at home here one day last week. "It's delicious, the dearest, what do you call it?" "That's—that's that's biscuit," she stammered.

The radio announcer's slang has annoyed her homes. A little girl here was annoyed by a cat scratching at the door the other evening when she was saying her prayers. She stopped and said "Stand by, God, while I let the cat out."

People you don't care very much about—The fellow who sits behind you at the movie and occasionally coughs down the back of your neck.

It is authoritatively stated that no radio announcer has ever been known to try and talk with his mouth full of hot mush. It just sounds that way.

Heard at Kinsella: "Golf has been a great help to me," said a lady at a social party of the women folks here last week. "Why, I didn't know you played golf," one of her hearers said. "I don't," was the reply, "but my husband does and he is such an enthusiast that he doesn't mind beating the carpets with his golf stick."

"This piece of lace is over fifty years old," bragged a Vegreville lady at a social at her home here recently. "Oh, it is so beautiful," one of the other ladies exclaimed "Did you make it yourself?"

"Your husband is a self-made man," remarked a minister here to the wife of one of our business men. "Yes, almost," she replied, "but I had to make a few alterations."

A friend, says a careful observer, is one who walks in when the rest of the world walks out. How many friends like that have you got?

Man is made of dust, says the Good Book. Perhaps that is the reason that so many of them dislike to be dry.

Heard at the poker party: "A burglar broke into my home last night." "Did he get anything?" "I'll say he did; my wife thought it was me coming home."

"Have you anything to say, prisoner, before I put you in the jug?" asked the judge. "No, your honor—except that it takes very little to please me."

Unchanged

"Do you act towards your wife as you did before you married her?"

"Exactly. I remember just how I used to act when I first fell in love with her. I used to lean over the fence in front of her house and gaze at her shadow on the curtain, afraid to go in. And I act the same way now."

A correspondent who is studying etiquette asks: "When is the proper time to lift or remove the hat?" For the benefit of our readers we would say that it should be removed or lifted at the following times and occasions: a circumstance may require: When mopping the brow; when taking a bath; when going to bed; when eating; when taking up a collection; when having the hair cut; when being shampooed, and when standing on the head.

The Greatest Threshing
Combination Ever Built

The Oliver Nichols & Shepard Combine is built around the Big Cylinder and the Man Behind the Gun—the patented grate and check plate located behind the cylinder and found in no other machine. This is the combination that saves more than 90 per cent of the grain right at the cylinder.

The Straw Carrier and Bar Beater System of secondary separation gets the last few kernels. Together, they form the greatest threshing combination ever built. That's why the Oliver Nichols & Shepard gives you More Bushels per Acre, More Dollars per Day.

Come in and learn more about them.

NEWS ITEMS

FROM KINSELLA

The many friends of Mr. Herrick Sr. will be pleased to know that he is now home after spending some little time under medical care in Viking Municipal Hospital. Mr. Herrick is slowly gaining strength and it is hoped that he will soon be in the best of health.

Some of the farmers are expecting to start cutting grain this week. A slow rain fell Saturday and Sunday. The grain is ripening fast and by the first of next week harvest will be in full swing. A wonderful crop.

One day last week while out riding horseback P. J. Wangness had the misfortune to have his horse fall throwing him off causing a broken shoulder blade. After receiving medical aid at Viking Mr. Wangness is now home and doing nicely.

Don't forget August 15th, the night of the big dance in Overbo's hall sponsored by the Kinsella Tennis Club. The Irma orchestra has been engaged. Free Lunch.

A dance is being held in the Lake Vernon School on Friday August 15th. Haircutting done every Saturday at the Kinsella hotel.

Mr. and Mrs. Kroschell and family motored from Comper, Alberta, and are visiting at the home of Mr. and Mrs. Figure. Mrs. Kroschell being a sister of Mrs. Figure. The Misses Bertha and Elona Figure are going back with them for a couple of weeks stay.

Mr. Figure is spending a few days in Edmonton.

Mrs. Wm. Lockhart has returned to her home from the Lamont hospital where Mrs. Lockhart underwent two operations. We are glad to report Mrs. Lockhart is now well on the way to recovery.

Mr. P. J. Stouffer arrived in town on Saturday on a short business visit. Mr. Stouffer has been away from here for several months and has been spending much of his time north and west of Edmonton. Mr. Stouffer says he may locate up in the north country.

The many friends of Mr. Herrick Miss Kjosness left on Monday evening for her home at Holden. She has been the past two months visiting home of Mr. and Mrs. W. Kerns.

Mr. and Mrs. Arthur Lamdon left on Monday evening for Edmonton where they intend to make their future home.

Miss Ella Cormack returned home on Friday from Edmonton where she has been the past two months visiting friends.

Four cars went from here to Loughheed on Thursday last containing members of the Womens Institute and their friends to attend the district Convention at that place.

Mr. and Mrs. McKee spent a few days in Edmonton last week.

The Womens Institute are holding a "Baby Clinic" in Lee's Hall on August 26th. Mothers please come and bring their babies.

The Tennis Club are holding a Dance in Overbo's Hall on Friday evening August 15th.

Mr. P. J. Wangness had the misfortune to have his horse fall with him one day last week, cracking Mr. Wangness shoulder blade, he is getting along very nicely at this writing. Dr. Little of Viking having reduced the fracture.

Mrs. Wm. Anderson returned to her home in Edmonton on Monday evening, after having spent a few days with Mrs. R. L. Eaton, while

here she also packed her household effects and Mr. Frank Williams took it to Edmonton on his truck. Mr. Anderson spent part of Sunday afternoon at the home of Mr. R. L. Eaton, morning.

Born to Mr. and Mrs. Stevens at the Viking Municipal Hospital on August 6th, a son.

Mrs. Sands and daughter of Edmonton are visiting the formers sister's Mrs. Carl Snogard and Mrs. P. J. Wangness and also her parents Mr. and Mrs. Lund.

Mr. Ben Wachter, foreman of one of the B and B gangs of the C. N. R. and his son Claude spent Sunday at their home here.

Mrs. Justice, son and daughter spent Sunday at Killam with their formers husband and daughter.

Miss Fleming of Holden is visiting at the home of Mr. and Mrs. Kerns.

The pupils who wrote on grades 9 and 10 were all successful in passing. Mrs. Waas entertained the young ladies of this place at Lake Hattie last Friday afternoon.

FROM JARROW

Mrs. Ed. Peet, and baby Glen and Miss Edna Peet, who have been visiting in Prince George returned home on Wednesday. They were accompanied by Miss Myrtle Peet who will spend a month at home, and Mrs. Crooks who will visit with relatives here and in Irma for some time.

Mr. F. Ramsey who will be in charge of the Pool elevator, arrived in town on Monday and opened the elevator for this season.

The Ladies Aid met at the home of Mrs. Jamieson on Wednesday afternoon. A good number were present and a business meeting was held, followed by the usual social hour.

Mrs. Jamieson assisted by her guest Miss Hazel Stretch, served delicious refreshments at the close of the meeting.

Miss E. Mee, of Edmonton is visiting in town, the guest of Mrs. J. McCracken.

Miss Betty Taylor is visiting with friends in Banff.

Mrs. Aileen Marbury is visiting with friends in Melville and Kamsack, Sask.

We are very sorry to hear that Mrs. H. Barker who resides south of town had the misfortune to break her leg.

Frank Manners, of Wainwright is visiting at the home of Mr. and Mrs. Firkus.

Mr. and Mrs. Williams are in town again after a months vacation.

Mrs. Wm. Lockhart, who has been a patient in Lamont General Hospital for the past two months, came home on Wednesday and is very

"I am not surprised at the divorce in this country," said a local lady at a social here. "Why not?" questioned one of her hearers. "Well, after we go to a movie and see a hero making passionate love to a beautiful woman, when we get home and ask our husband if he loves us, we usually get 'uh-huh' for an answer," she replied.

"My wife is a great woman, for facts," said one lodge member to another at a meeting here. "So is mine," the other replied. "Why, I've known her to sit up until two o'clock in the morning looking for facts."

much improved in health. Mrs. Austin of Calgary is a guest of Mrs. James, south of town.

A very poor showing was made by the scholars of the senior school, of the school, in the recent departmental examinations. Only two of them passing, one in grade 10 and one in grade eight.

Warren Daugh, of Bashaw is visiting with Lester Taylor at the mance.

The warm weather of the last few days has ripened the grain and harvesting will be general about next week.

Lougheed

GOOSE CREEK HOLD ANNUAL FAIR, AUGUST 6th, 1930.

The Goose Creek Agriculture Society held their annual fair on Wednesday, August 6th, and lived up to their reputation of having the best country fair in the Province.

This fair is an exhibition of the best horses, cattle and livestock, as well as grains, flowers, garden produce and Women's Work, of the district.

It is an educational exhibit and does not pander to the amusement of the crowd, and the fact that there is always a surplus in the treasury proves the wisdom of the directors in their action.

The quality of the exhibits is just a little better than those seen at the city exhibition as proven by the fact that a Clyde mare which won the first prize at the Calgary exhibition was second best at Goose Creek.

Among the cows shown was the mother of the Champion Polled Angus Bull at the Toronto exhibition last year. This animal is owned by J. Liddle of Loughheed.

C. E. Legg, of the Hardisty branch of the Bank of Commerce, is relieving in Loughheed, while Pat Craib is taking his holidays.

Flowers — Mr. F. King of Selge-wick.
Poultry — Mr. T. Bullock of Loughheed.

Mrs. Abram and two children of Edmonton are visiting at the F. Grande home this week.

Mr. and Mrs. Tony Johnson and two children of Wetsakwin are visitors at the G. Johnson home this week.

The vegetables and cut flowers were also above the standard and there was a good showing of poultry.

A large crowd was present and all a lively interest in the judging which was carried on by the following well known and capable judges:

Cattle — Mr. Boggs of Okotoks. Horses — Mr. Lusk of Alderboro. Ladies Wool — Mrs. J. McGregor Smith of Edmonton.

Grass & Grains — Mr. Bowler of Selge-wick.

Mr. and Mrs. Wilbur Coughlin and family also Mahlon Coughlin returned to Vancouver by motor last week after holidaying at the M. Coughlin home.

Mr. and Mrs. Paull and family of Strome recently moved to Loughheed where Mr. Paull will re-open and operate the Pioneer Elevator.

Ernest Pederson is holidaying at Grande Prairie, where he is visiting his brother Ed who is a member of the Bank of Montreal at that point.

Miss Jean Adams returned to the home of her parents Saturday evening after spending the past six weeks attending summer school at Edmonton.

Rodino Held

Enjoyable Sports

(From The Viking News)

A very successful sports day was held under the auspices of the Rodino Young Peoples Society on Wednesday, August 6th. About 500 people were in attendance during the day. Chief among the attractions was a baseball game which was won by the Rodino team from Glenora; Minburn won the basketball game; and Phillips won the football tournament. The winners of the tennis matches were Mr. Mills and Miss Manning.

Summer COLDS

Almost everybody knows how Aspirin tablets break up a cold—but why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

WORLD HAPPENINGS BRIEFLY TOLD

In a recent month 12 tons of freight were carried by air from the Netherlands to London, England.

Victoria, largest dry spot on the lower map of British Columbia, may "vote again shortly on the question of beer parlors."

With labor unrest spreading throughout northern France, a general strike of textile workers in Roubaix and Halluin was called, affecting nearly 100,000.

The gross earnings of the Canadian National Railways for the ten-day period ending July 31, were \$6,519,364 as compared with \$5,224,994 for the corresponding period of 1929, a decrease of \$1,705,490.

Because he finds England more inspirational to poetry, Conrad Aiken, well known United States poet, has sailed for England, possibly to remain the rest of his life. He won the 1930 Pulitzer award for the best American verse of the year.

Mr. Macquisten has appeared in the British House of Commons in a suit of shantung silk, courageously giving a lead to drably dressed politicians, says a writer in The Guardian. In 18th century Parliaments, the attire of members must have made the House a feast of color.

Plans for production of an all European news reel include talks made in the Arctic regions. A German-Swedish company will use dog sleds and a specially fitted steamship in carrying the first sound-film cameras ever to penetrate the Arctic Circle.

In the presence of thousands of citizens and visitors, Sudbury recently celebrated its entry into cityhood. Decorated floats paraded for an hour through the streets. Hon. Charles McRae, Minister of Mines for Ontario, presented the charter bearing the seal of incorporation.

The German aviators, Hirth and Weller, who reached Iceland on an attempted flight from Germany to the United States, have abandoned their project and Hirth sailed for Montreal with their small monoplane. His companion will take the next ship back to Germany.

Nationalize Coal Mines

Drastic Steps in British Coal Mining Industry Are Planned

Rt. Hon. William Graham, President of the Board of Trade, in a speech at Durham, England, said the recently passed coal bill was a Parliamentary step along the road which the British Government intended to follow until the great collieries were the property of the people. His audience, composed largely of farmers, welcomed the sentiment expressed. "We are pledged as a Government to nationalize the mining royalties, and we hope the time will be found in the next session for that bill," Mr. Graham said.

Must Wear Home Products

A new law has been passed in Persia, similar to certain laws passed in England a few centuries ago, compelling every government official, from the highest to the lowest, to wear clothes made of Persian manufacture only. Severe penalties are to be meted out for every infringement of this law.

"You paid for your dinner yesterday, sir, but you forgot the waiter." "Oh, should I have eaten him?" — Buen Humor, Madrid.

W. N. W. 1850

Interesting Exhibits

Floating Museum Of Byrd's Antarctic Expedition

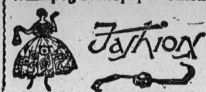

The City of New York, flagship of Rear-Admiral Byrd's Antarctic expedition, is to go on tour as a floating museum of the Antarctic. Admission will be charged to the public in an effort to overcome the expedition's deficit of more than \$100,000, which continues to mount because of the expense involved in assembling the scientific material brought back by the expedition.

Announcement of the move came from Captain Ashley C. McKinley, in charge of the expedition's affairs in the absence of Admiral Byrd. The ship will go on exhibition at the Ninety-sixth Street pier in the North River, and will be open to the public from 10 a.m. to 10 p.m. On leaving New York it will go to Boston and other New England cities and will proceed south along the Atlantic seaboard.

"More than a month has been spent in assembling the models and exhibits built by the expedition members" during the Antarctic night," Captain McKinley said. "When open to the public the ship will contain the most complete exhibition of Antarctic specimens ever gathered, as well as hundreds of other souvenirs of the expedition."

On view will be a model of Little America, constructed to scale by the American Museum of Natural History; models of the Floyd Bennett, the airplane used in flying over the South Pole; models of other expedition "planes"; a model of the City of New York and a replica of a camping scene showing one of the exploration parties.

Winnipeg Newspaper Union

(By Anabelle Worthington).

A printed crepe silk shows how well it can be in straight silhouette with low-flared fullness. The pointed outline of the hip yoke and the circular skirt flounce, produce a particularly slenderizing effect.

The neckline is interesting in cool open V-shape. The rolled collar and jabot of plain crepe match the background of the print.

The short sleeves with elbow flare are very smart.

Style No. 2574 can be had in sizes 14, 16, 18 years, 36, 38, 40 and 42 inches bust.

It's very pretty in printed chiffon voile that will give such excellent service.

Shantung, flat crepe silk, pastel sheer linen and printed batiste are fashionable fabrics for its development.

Pattern price 25 cents. Be sure to fill in size of pattern. Address: Pattern Department.

Aviators Have Trying Trip

Combat Engine Trouble While Flying North Of Port Churchill

After combating engine trouble away north of Churchill, making emergency repairs and carrying out their mission two Royal Canadian Air Force planes are back at their base at Corner Brook, Mile 42, Hudson Bay Railway. The officers are E. Hickson, flying a Fairchild, and M. B. Barclay, flying a Bellanca. They conveyed A. E. Forsell, Federal Government official, to the far north to collect data on reindeer pasture.

According to reports from Churchill, the officers were flying about 100 miles north of Eskimo Point on Hudson Bay and about 80 miles south of Chesterfield Inlet, when a cylinder locked on the Fairchild. They dropped down in the sea.

The ship "York," plying northern waters, was nearby. The captain offered assistance but the pilots found they could make repairs. They managed to get off the water and limped through the air, finally coming down at Vavane, a small trading post, and base of operations of Dominion Explorers. Vavane is about 100 miles from Eskimo Point. Their destination was in the "barrens" about 150 miles west of Vavane. At Vavane they met Alex Nicholson in charge of Dominion Explorers' base. He helped them with spare parts and they flew out into the barrens.

Long Telephone Call

Radiophone Conversation Between South America and Australia

Advices received at New York from Buenos Aires describe a radiophone conversation between Captain Lewis Yancey in an aeroplane and Sydney, Australia.

The connection, which was made from the plane, 5,000 feet above the Buenos Aires airport, established a distance record for telephoning from an aeroplane in flight. It spanned 14,000 miles.

The call was relayed from the radio station at Buenos Aires to Madrid, Spain, thence over land lines to the French side of the English Channel, where submarine cables carried it to England. At Rugby the beam wireless picked it up for wireless transmission to Sydney.

Accepts Vice-Presidency

Lady Willingdon Takes Interest in Canadian Branch Of Dr. Barnardo's Homes

Her excellency, Lady Willingdon, has accepted the honorary vice-presidency of the Canadian branch of Dr. Barnardo's Homes. It was announced by the Canadian headquarters of the organization.

Lady Willingdon is a daughter of the late Lord Brassey, the latter being president of the Barnardo's Homes organization in England at the time of her birth, and a great personal friend of the late Dr. Thomas John Barnardo. Her father took a keen interest in the migration of boys and girls to Canada.

Recipes For This Week

(By Betty Barclay)

SNOW-TOPPED SALAD

On a bed of crisp lettuce leaves arrange a mound of fruits of various kinds, cut in small pieces. Oranges, pineapples, apples, grapes and peaches are excellent. Berries in season, or small cubes of watermelon or cantaloupe, may also be utilized. Top this with a liberal serving of stiffly-beaten, sweetened whipped cream. Immediately before serving, sprinkle the fruits and lettuce base, liberally, with a syrup made by dissolving four teaspoons of sugar in the juice of two oranges and one lemon.

SWEDISH SPRITZ COOKE

1 cupful sugar.
1 cupful butter.
2 eggs.
4 cupfuls flour.
1½ teaspoonful baking powder.
Mix all ingredients together in bowl, adding baking powder with flour. Mix with the hands until ingredients are blended, being careful not to work too long. Push through pastry gun. Shape in rings or 8 shapes. Bake in a quick oven.

Dog's Name In Phone Directory

Pussy Willow Thornton, an aristocratic building, has a telephone listed in her own name. It was revealed in Chicago. A few lines above Pussy Willow's name will be found the name of Mrs. B. Thornton, the dog's mistress. Mrs. Thornton's theory is that animals are as human as people and therefore have a right to be listed in the telephone directory.

It's strange that a motorist never remembers he used to be a pedestrian.

Claims Matter Is Weightless

Scientist Gives New Definition Of Weight and Force Of Energy

After delving into philosophical questions as a hobby from a very early age, W. Donald Mitchell, under the nom de plume of "Logos Philo-tus," has published "The Great Light of Relativity."

In his work, Mr. Mitchell, who was born in Pembroke, Ontario, of Scottish parentage, claims to reveal that "the earth does not weigh so much as one ounce, that matter is weightless," and gives a new definition of weight, and also of the force of energy. He claims to reverse Newton's equation of attraction, and Einstein's space-time-energy theory. He gives other concepts of philosophy in axiomatic form, chief of which seems to be his statement that, "knowledge, or intelligence, is the relative, transient, personal and material reflex from objects and elements of external reality, partially retained in memory—in or on the negative plates or cells of the brain."

The author of this remarkable work believes himself to have made the most remarkable discoveries in recent generations, and thereby set a new standard for philosophy, metaphysics, psychology, and thus also education. "It promises to affect the entire scientific thought of the age," he says. He makes no declaration dogmatically, but states: "I shall be delighted to receive, either personally or otherwise, any criticism for or against any statement, axiom or definition, appearing herein, for in criticism and unbiased investigation."

The Peking Man

Canadian Scientist Has New Theory Regarding Discovery In China

The "Peking Man" was really an adolescent girl, who lived possibly 1,000,000 years ago, Dr. Davidson, a Canadian scientist, said, in announcing the discovery of a second ancient skull.

The noted paleontologist, who dug up the skull of the "Peking Man" some months ago, said he had found the second cranium embedded in the rock of the same cave in which he found the first skull.

The second is that of an adolescent male, Dr. Black said, and the measurements further indicated the first skull was that of a girl.

Grape Juice Duty

Special Tariff Item Designed To Meet Foreign Competition

A special issue of the Canada Gazette announces that an order-in-council has been passed bringing into effect the special tariff item designed to meet foreign competition in concentrated grape juice. Grape juice previously was all under one duty. The new duty provides a tariff of 25 cents a gallon with an addition of three cents a gallon for each .01 increase in specific gravity above 1.074. It comes into immediate effect.

Place any man where he has no installment payments, no taxes, no stock losses and still he'll save the bars to get out.

Colorful Scenes At Indian Treaty

Week Of Fun At Nelson House Trading Post

The picturesque Cree Indian reserve and trading post at Nelson House was the scene of a colorful carnival recently upon the occasion of the annual visit of the treaty party. Native dances and modern sports vied with each other on the spacious common at this treaty spot on the Burntwood River in Northern Manitoba. Football games and a beauty contest were outstanding features of the week of fun.

Nelson House, which is reached by canoe trails from either Mile 137, Mile 185, or Mile 270, on the Hudson Bay Railway, is one of the oldest trading posts in the Manitoba hinterland.

The treaty party travelled in two canoes and was in charge of W. D. Tweddell, Indian Agent in charge of this territory. Other members of the party included Arch. Richardson, assistant to Mr. Tweddell; Dr. R. W. B. Wengal, of Winnipeg, and Sgt. J. Nelson, of the R.C.M.P., The Pas, besides Indian guides G. W. Jones, of the provincial game department, was also at Nelson House during treaty time.

Indians had assembled from all over the Nelson House area for the gala event, and they established a veritable tented city at the trading post. About 425 natives received their annual payment of five dollars a head from the Federal Government.

Enforce Prohibition Laws

New United States Prohibition Director To Proceed Against Larger Violators

Maintenance of "steady pressure" against the large violators of the United States dry laws was announced by Prohibition Director Ames W. Woodcock, as a guiding policy of the reorganized enforcement unit.

"I will not have our agencies following the course of least resistance and wasting their time upon pitiful, picaresque, non-commercial cases," he said. "I think the prohibition laws can be successfully enforced against commercial operations. I propose to make that our objective and not to dissipate our energies in other fields."

"I shall insist that a steady pressure be maintained against these commercial violations. I disapprove sensational methods."

Woodcock's statement was issued after a day spent in conference with the twelve administrators, recently appointed to take charge in the field, and a group of special agents responsible directly to national headquarters for investigation work.

Survey Of Wood Waste

The Vancouver Forest Products Laboratory, conducted by the Forest Service of the Department of the Interior, is engaged on a survey of wood waste in British Columbia sawmills with a view to assisting the industry in devising methods of profitable utilization of wood now wasted.

We think we're a smart people but it took half a century for salesmen to learn not to ask the woman customer what size shoe.

No Loss From Pool Guarantees

Wheat Pool Did Not Have To Call On Government For Funds

A special despatch to the Toronto Mail and Empire from Ottawa says:

"From no less a person than the chief statistician of the Canadian Wheat Pool's selling headquarters in Winnipeg, government authorities in Ottawa have received the cheering information that the prairie provinces have incurred no loss from their guarantee of the Wheat Pool's operations."

"Early in the year, when it became apparent that Canada was not going to be able to market her whole crop and that the market price had suffered a severe slump, the three prairie governments put their credit behind the Wheat Pool to the extent of guaranteeing the banks against loss through the advances made to the pool."

"According to information supplied to the Dominion government, there has been no loss. The pool's crop year ended July 15. Everything transacted from July 16 onward is part of the 1930 pool. Compilation of the final returns of the 1929 pool is under way, and has progressed far enough to reveal that the pool sold enough wheat above the dollar price to at least compensate for the quantity which had to be sold below that mark—leaving the provincial guarantees uncalled."

"Andrew Cairns, statistician for the pool, was in Ottawa several days ago securing passports and making preparation for a trip to Russia. He has now departed for that country for the purpose of surveying at first hand the state of wheat growing in the land of the Soviets and determining to what extent Russian is looting as a serious factor in European export wheat supply. Mr. Cairns informed the government of the situation in regard to the guarantees, which, he said, would now expire."

Mediterranean Service

Inauguration Of A New Monthly Service From Canada

Inaugurating the new monthly service from eastern Canadian ports to Gibraltar, Malta, and other Mediterranean ports, the "David Livingstone" will sail from Montreal on or about September 10. This will be the absence of a direct steamship service between these ports and the S.S. Bengala.

The new service, according to the Department of Trade and Commerce, will consist of special motorships, equipped for cargo and accommodation for 10 or 12 passengers. Owing to the absence of a direct steamship service between these ports, and Montreal or Halifax, Canada has not been able to share in these markets to any extent in the past.

New York now has four airplanes for its police patrol, which will watch out for law-breaking from the vantage point of the air.

The pimento tree, a Jamaica native, is the source of allspice.

THE PALE WESTERN CUT- WORM

A Grave Warning to Farmers

By H. G. L. Strange
The Dominion Entomologists of Lethbridge and Saskatoon, Mr. H. L. Seamans and Mr. K. M. King, have issued a very grave warning to all farmers in Alberta and Saskatchewan regarding the great damage to crops that may occur next year because of the cutworm.

The dry May and part of June that has been experienced in most parts of Alberta and Saskatchewan this year has tended enormously to increase that insect pest, and it is expected that unless May and June of 1931 are much wetter than is usually the case, that the greatest and most widespread damage that has ever been experienced will result from cutworms. Most of Saskatchewan south of Saskatoon, it is expected, will be badly affected, with the worst damage within a hundred mile radius of Regina. In Alberta the damage will probably be very general east of a line from Edmonton to Macleod and as far south as the Lethbridge-Medicine Hat line of the Canadian Pacific Railway.

The damage to the 1931 crop will depend absolutely upon the way fields

are handled this present August and September.

The moth of the cutworm flies across the fields and lays its eggs, starting in the first few days of August, reaching its maximum flight about the 20th, and continuing to fly and lay eggs until about the middle of September.

This moth will avoid all land that has had even a very slight crust formed on it by rainfall, but will lay its eggs upon any soil where this crust has been broken, however slightly.

To avoid cutworm damage on a field, therefore, it is necessary that on summer-fallowed fields all work should stop by the first of August or a very few days afterwards. Then a very slight rain will form a crust on these fields which will render them immune the following year from cutworm damage.

It is most important that no horses or stock or implements or wagons shall be allowed to cross any summer-fallow prepared in this fashion, because where ever the crust is broken by animals or implements there the moth will lay its eggs, and a great deal of damage will be experienced the following year.

On fields in crop, where harvesting operations are conducted before about September 1st, then damage the following year is almost certain

to be experienced unless these fields are summerfallowed.

It is apparent, therefore, that all fields which are cropped this year, as far as possible, should be summerfallowed in the year 1931, and that in addition all work on summerfallowed fields this year should cease as soon after August 1st as possible, and that nothing should be allowed to walk over or across these fields.

Mr. H. L. Seamans, Dominion Entomologist stationed at the Lethbridge Laboratory, without hesitation states that it is far better to allow weeds to grow on the summerfallow after August 1st in these affected areas rather than, to disturb the crust of the soil and so invite cutworm damage.

The automobile is a wonderful invention, says a careful observer. Why nobody dreamed 25 years ago that a man would be able to step into his car and go anywhere that his wife and children told him to go.

Heard at the Wainwright hospital: "Doctor, have you and the consulting physician decided what is the matter with me?"

"Not yet."
"But I heard you were going to decide this morning."
"Oh, that was only a straw vote."

Main Street

Miss Lillian Whitty, of Edmonton is visiting at Fenton's.

Mr. Grover Arnold, has been spending a few days in the city.

Mrs. M. L. Curfman, returned Wednesday after spending a couple of weeks in Edmonton.

Mrs. L. D. Henry, of Frazee, Minnesota, is visiting her daughter Mrs. V. Larson.

Mr. A. Locke and family returned Tuesday after motoring to Banff and intervening points.

Mrs. J. Hubman, who was dangerously ill last week appears to be recovering.

Miss Lila Maguire, of Edmonton has been spending her vacation with her folks at Irma.

Mr. and Mrs. Cavana and daughter Zena, of Calgary have been spending a week with the Smarts at Sunny Brae.

Mr. Elmer Enger, has returned from Landis, Saskatchewan where he has been relieving the pump man on the C. N. R.

Mr. H. Skjeie, of Olds is relieving Mr. H. E. Jones manager of the local branch of the Bank of Montreal, who is on a motor trip to the coast.

Next W. A. meeting will be held on Tuesday, August 26th at the home of Mrs. George Higginson at 2.30 p.m. Mrs. Batchelor and Miss Bacon serving lunch. Every lady welcome.

Wednesday the Battle River club timers held a reunion at Hardisty when one of the largest crowds that ever assembled at the Hardisty lake was there. Seven quarters of Buffalo were roasted and a regular old time feed was enjoyed by all.

CEREAL CROPS FIELD DAY AT DOMINION EXPERIMENTAL STATION, LACOMBE, ALTA. ON AUGUST 20th, 1930

The annual Cereal Crops Field Day will be held at the Dominion Experimental Station, Lacombe, on Wednesday, August 20th. This will be a day of special interest to all farmers interested in the growing of good crops, but particularly will it interest members of the Seed Growers' Association and Co-operators who are growing varieties under numbers.

The Dominion Cerealist, Mr. L. H. Newman, will be at the Station on this date and will discuss all questions pertaining to varieties and crop improvement. It is possible that the date, August 20th, may be a little late for some farmers but it is the earliest date on which we could arrange for Mr. Newman to visit the Lacombe Station.

A meeting of the Alberta section of the Canadian Seed Growers' Association will be held at the close of the field meeting.

All farmers are invited to visit the Station for this field day. Bring your family and invite your friends. Coffee will be provided for lunch under the trees. Make this a day of pleas ure and profit. Programme to commence at 1.30 sharp. — F. H. Reed, Superintendent.

WANT ADS
